

“

Guernsey Tomorrow

Introduction

By David Twigg

”

“

What is ‘Guernsey Tomorrow’?

”

- Letting people have a say about what sort of place they want Guernsey to be like in the future
- Finding the best fit between the pressures for change and the opportunities available
- Setting the direction that will prioritise how we all inhabit and use the space we have on the island

“

Key Facts

”

- We've gathered together all the relevant information to present a portrait of Guernsey and to see how the island is changing
- Our baseline study is a 'living' document and is continually updated
- **We would like to know if there is any important evidence that we have overlooked!**

“

Key Issues

”

- Based on the evidence available, we've begun to focus on the key issues, challenges and opportunities that the island will face
- **We would like to know which issues are of most concern to you and whether there are any important issues that we have overlooked!**

“

What will happen next?

”

- When we've got an idea of the main issues, challenges and opportunities that are of most interest to everyone...
- we can begin to generate some **options** for the future...
- we will hold a follow-up workshop in November for you to help us.

“

and then what?

”

- Once we have had chance to evaluate all the various options...
- we will feed back the results...
- and present the findings in a discussion paper (or Green Paper) with some proposals.

“

Thank you ...

”
