

### GOOD, BAD OR UGLY BECAUSE ...

Good – an essential facility but a longer runway could lead to less frequent services.

Good – a jet.

Nothing inherently bad about any of these. Allow Guernsey to take part in the 21<sup>st</sup> century.

Good – first impression of the island, modern.

Bad – always worried about cover.

Good – air travel is going to get bigger. So important for Islanders to be able to get away.

Too expensive to use of most pollute as it is old.

Travelling off island is both expensive and often impractical.

Need a longer runway – should have been done when designed.

Smoke in the cabin?

Bad – Debt!

Good – for tourism & business

Bad – if you live near the airport.

### ... IN THE FUTURE WE SHOULD ...

Consider carefully how we are involved and how we develop – but we must move forwards.

Train both fire brigades so town can act as a cover for both.

Sort out firemen (train more) – must be invested in as it is as large part of attracting tourists.

States need more backbone to deal with these situations, although this would have been difficult with major banks threatening to pull out of the Island.

Not let the airport get too big, so the island changes.

Maintain and expand links.

Landlock all firemen that force the airport to close.
