

### GOOD, BAD OR UGLY BECAUSE ...

Bad - potential danger to health and devalues neighbouring properties.

Good - enables us to operate as a viable business economy.

Ugly - but if they disappeared a lot of people would complain about not having fast enough internet or not being able to use their phone.

Ugly - dangerous. Brain cancer is increasing, especially starting around the ear area.

Ugly - but necessary in 21<sup>st</sup> century.

It's (probably) necessary fact of life.

Find another way.

Minimise and avoid duplication of masts.

Ugly and bad - health, change landscape.

Ugly - very intrusive.

Eye-sore.

Good - necessary for communications/advancement.

Bad - do we really need so many operators.

### ... IN THE FUTURE WE SHOULD ...

Comply with Australian, Russian, German etc. safety standards for masts.

Make operators work together to reduce the need for masts whilst still providing same service.

Disguise with mock foliage as they do in the States etc.

MAKE operators work together to reduce the need for masts whilst still providing same service.

Share/reduce masts

Cover with Ivy.
