

GOOD, BAD OR UGLY BECAUSE ...

Bad – this area is too small for such cargo vehicles. Should the terminus be somewhere also? But where!

Buses should have designated lanes so that they can be relied upon instead of stuck in traffic jams. Compulsory car pooling?

Good but buses are too big.

Poor to bad street furniture. The bins are bad design, poorly located and maintained.

Use buses more.

Good actually I find buses especially well painted and designed vehicle – attractive – enhance seafront like train.

Use buses more.

[Buses] Don't make much/any profit. Take up too much room on the roads. Not really efficient use of space – poor layout.

Very good bus routes and drivers.

Bad – too big for the island.

Good – public transport, low cost for a good service and environmentally friendly.

Ineffective Government (no direction).

Good service and available in a central place.

Bad – frequently empty (under-utilised esp. Route 4)

... IN THE FUTURE WE SHOULD ...

Night buses and more regular buses.

Take bikes on buses (racks on the front) to encourage commuters worried about cycling home uphill!

Use buses more.

Have prettier street signs/furniture throughout island.

Good system. Keep Island coachways – a public sector business.

Look at thinner buses.

Buses should run later.

Paid parking – free bus service.
