

GOOD, BAD OR UGLY BECAUSE ...

Isn't it the truck that's too big?

Buses provide excellent service – they need to be big – we don't complain about lorries etc!

Bad – a need to restrict size of vehicles on Island.

Is it the truck or the bus that is the problem? This bus is less than the 20+ passengers would cause in their own cars.

Buses are too big for rural lanes!

Bad – restrict vehicle size.

Bad – buses are too big – driving on pavement.

Surely need more one way stretch.

Buses not suited for roads.

Too big, not enough services.

Buses are too big therefore they have to drive on roads making it unsafe for pedestrians.

Bad – they emit too much diesel

Good – increases mobility for some islanders.

Are they just for the school run? Too dangerous for our roads.

... IN THE FUTURE WE SHOULD ...

Good – small, frequent electrical buses. Cheap – paid for by petrol tax or/and paid parking.

Smaller buses.

Limit industrial vehicles of large size.

Vehicle size restriction in lanes.

Consider smaller buses more routes.

Improve bus timetable and have smaller frequent buses.

Restrict delivery vehicle/lorry movement during rush hour.

Better bus routes, smaller buses and more frequent convenient service.

Smaller buses but more of them.
