

WORKSHOP ON 9TH June 2009 AT BEAU SEJOUR

CAROUSEL

NO IDEA (GROUP 2) IDEAS

Common ideas that fitted with those of other Groups:

1. Enhancement of community focussed facilities.
2. Focussing development in existing urban centres/communities – especially 'key workers'.
3. Providing housing through conversion of redundant buildings.
4. Supporting farming.
5. Managing traffic.
6. Producing more food locally.
7. Generating power from tidal energy.
8. Belle Greve Bay marina.

Conflicting ideas that would not work well with those of other Groups:

1. Waste disposal system.
2. New urban centres.
3. Land reclamation in Belle Greve Bay.
4. Housing development can be distributed more widely.
5. Wider opportunities for old glasshouses.

Innovative ideas suggested by Group 2 and highlighted by other Groups:

1. Use of former hotels for housing conversion.
2. More housing at Leale's Yard – **not** shops.
3. Remove power station – eventually.
4. Use of schools for community/training.
