

## WORKSHOP ON 30<sup>TH</sup> June 2009 – SIXTH FORM CENTRE & GCFE

### KEY POINTS OF CHOSEN STRATEGY GROUP NAME: GROUP 3

#### KEY ACTION POINTS

- 1 Housing Control System.  
Reconsider residential qualifications and local/open market housing system.  
Less skilled workers are attracted due to regulations. Some locals may contribute less to society than a foreign worker.  
Bring in more skilled workers for the health service.
- 2 Airport.  
Extend the runway to increase trade – keeping it as it is acts as a constraint on Guernsey tourism.
- 3 Schools.  
Knock down older schools and rebuild new, better equipped schools that can be used by the whole community.  
Maintaining low populated schools is a waste of money.
- 4 Coastal Management Plans.  
Sea defences and drainage systems.  
Otherwise problems will occur during storm surges.
- 5 Longport Development.  
Give go-ahead for gradual development to provide more jobs and homes.  
Failure to do so could lead to further urbanisation of the rural area.

#### OTHER POINTS CONSIDERED

Don't want to see rural areas becoming too urbanised.
